

SULLIVAN-PALATEK: SUPPORTING CRAFT BREWERIES WITH RELIABLE, CLEAN, DRY COMPRESSED AIR

**SULLIVAN
PALATEK**

Compressed air is the unsung hero in craft brewing, powering essential processes from fermentation to packaging. At Sullivan-Palatek, we understand how crucial clean, dry consistent air is to your operation—and we're here to help you brew better.

AERATION FOR FERMENTATION

Before yeast gets to work, your wort needs oxygen. Our compressors deliver the clean, dry air required to safely aerate wort, giving your fermentation a strong and healthy start.

PNEUMATICS & AUTOMATION

Automated valves, canning lines, and packaging equipment all rely on compressed air. With Sullivan-Palatek's industrial-grade rotary screw compressors, you get the consistent pressure and reliability needed to keep operations flowing—without interruption.

EFFICIENT CLEANING & SANITIZATION (CIP SYSTEMS)

From tanks to transfer lines, Sullivan-Palatek compressors keep your CIP systems running smoothly. Our dependable air supply powers the valves, pushes cleaning fluids, and supports complete system sanitation—protecting the integrity of your beer.

BOTTLING, CANNING & KEGGING

Whether it's rinsing bottles, sealing cans, or cleaning and filling kegs, compressed air is essential. Our systems help you maintain speed, efficiency, and sanitation throughout the packaging process.

CLEAN, DRY, OIL-FREE AIR—ALWAYS

In brewing, air quality isn't just important—it's critical to preserving flavor, consistency, and safety throughout the process. That's why Sullivan-Palatek offers:

High-efficiency
filtration systems

Refrigerated or
desiccant dryers

ISO 8573-1 compliant air solutions
You get peace of mind knowing your
product is safe from oil, water,
or contaminants.

BUILT FOR BREWERIES LIKE YOURS

Whether you're a growing microbrewery or a mid-sized operation, our compressors are designed for demanding, high-use environments. Plus, with Made in the USA craftsmanship and excellent service support, Sullivan-Palatek is a partner you can count on.

READY TO RAISE A GLASS TO BETTER AIR?
