

UNLOCK EFFICIENCY AND CUT COSTS WITH SULLIVAN-PALATEK

**SULLIVAN
PALATEK**

Compressed air is essential to keeping industrial operations running smoothly. But while it's a vital utility, it's also one of the most overlooked when it comes to efficiency and cost control. In fact, many facilities waste 30–50% of the energy used to generate compressed air due to leaks, pressure loss, or outdated equipment.

That's why a Compressed Air System Assessment, backed by Sullivan-Palatek and executed through their network of authorized distributors, is an invaluable step toward boosting efficiency, improving system reliability, and cutting operating costs.

WHY CHOOSE SULLIVAN-PALATEK FOR YOUR COMPRESSED AIR ASSESSMENT?

Sullivan-Palatek is a U.S.-based leader in industrial air compressor technology, offering high-performance rotary screw compressors engineered for efficiency, durability, and low cost of ownership. When paired with an expertly conducted system assessment, Sullivan-Palatek solutions are designed to maximize the return on your investment in compressed air.

Assessments performed by Sullivan-Palatek authorized distributors are comprehensive, data-driven, and tailored to your facility. You'll get the insight needed to:

**ELIMINATE
ENERGY WASTE**

**IMPROVE
PRESSURE STABILITY**

**EXTEND
EQUIPMENT LIFE**

**PROTECT EQUIPMENT.
ENSURE PERFORMANCE**

WHAT'S INCLUDED IN THE ASSESSMENT?

Working with a Sullivan-Palatek authorized distributor means more than just identifying problems—it means finding the right solutions. The assessment typically includes:

**DEMAND
PROFILING**

**COMPRESSOR
PERFORMANCE
ANALYSIS**

**LEAK DETECTION
AND LOSS
QUANTIFICATION**

**SYSTEM
DESIGN REVIEW**

**AIR
QUALITY CHECK**

ENERGY EFFICIENCY

With compressed air often accounting for 10% or more of a plant's total energy bill, the savings potential from an assessment and equipment upgrade can be substantial—often delivering ROI in less than two years.

SYSTEM RELIABILITY

Identifying weak points or stress areas in your system helps prevent unexpected failures, downtime, and costly repairs.

SUSTAINABILITY GOALS

Compressed air optimization is a smart step toward meeting environmental targets, ISO 50001 standards, or energy-reduction initiatives.

THE SULLIVAN-PALATEK ADVANTAGE

Sullivan-Palatek's compressors are engineered to perform efficiently under real-world conditions. Their rotary screw compressors—available in a wide range of configurations—deliver reliable power with industry-leading specific power ratings. Combined with expert guidance from their authorized distributor network, you'll have a clear path from assessment to action.

Whether you need to right-size your system, install variable speed technology, or simply eliminate leaks and pressure loss, Sullivan-Palatek and its distribution network partners provides the tools, technology, and support to make it happen.

READY TO GET STARTED?

A compressed air system assessment is more than a diagnostic—it's a strategic step toward lower costs, improved productivity, and longer equipment life. Partner with Sullivan-Palatek and their authorized distributor in your area to schedule an assessment and start unlocking the full potential of your system.
